

Progetto per Incrementare lo Sviluppo degli Interessi per le Discipline Scientifiche negli Studenti Liceali

Seminari in lingua inglese a carattere divulgativo dedicati allo sviluppo, negli studenti degli istituti secondari di II grado, di una maggior connessione tra lo studio delle materie scientifiche e la ricerca a livello universitario e post-universitario.

WHY THINGS BREAK - A JOURNEY IN FRACTURE MECHANICS

Professor Laura De Lorenzis
Dept. of Mechanical and Process Engineering
Institute of Mechanical Systems
ETH Zurich, Switzerland

This lecture will offer a glimpse into the science behind why things break and how we can prevent it, or purposefully induce it, in engineering such as in everyday life. We will review fundamental insights from the past and highlight open issues for the future, along with old and new methods for scientific investigation in this fascinating field.

Giovedì 4 luglio, ore 18.00 - 19.00

CISM, Palazzo del Torso
Piazza G. Garibaldi 18, Udine
